ZottaOS MSP430 Configurator

**ZottaOS**

A Configuration Tool Customized for ZottaOS Family of Kernels Targeted for TI MSP430 and CC430

Switching or upgrading to a different microcontroller requires reconfiguring the clock sources and the interrupt sources. This task is easily accomplished with ZottaOS MSP430 Configurator in 5 simple steps.
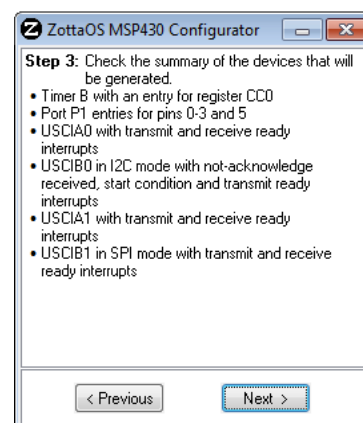

Step 1: Choose the micro-controller

Step 2: Choose the peripheral devices

Step 3: Check the selected devices

Step 4: Set the system clocks

Final step: Generate ZottaOS files
